Cut pieces

Full guide

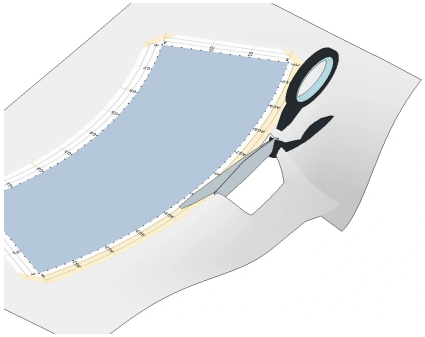

1 Find the cut line

Step help

Find the outermost solid black line. The arrow points to the cut line; keep the seam allowance inside it.

2 Cut along the line

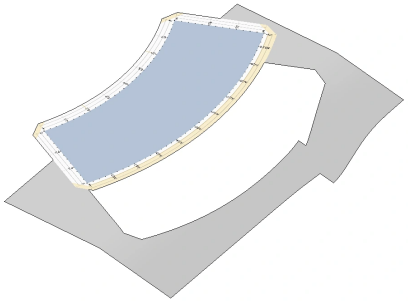

Step help

Cut through the waste from the fabric edge to the outermost solid black line. Follow the line with the fabric scissors.

Cut pieces

3 Lift out the cut piece

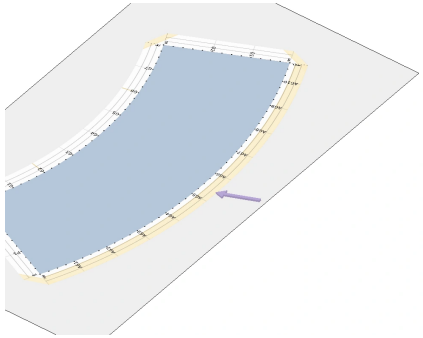

Step help

Remove the surrounding cloth. Keep the full marked seam allowance attached.

Cut pieces · Tips

1 Work in smaller sections

Step help

Rough-cut the sheet into smaller sections before cutting each exact outline. Cut only through the waste between pieces. Smaller sections are easier to handle and help prevent folded fabric slipping under the scissors.
