Remove basting

Full guide

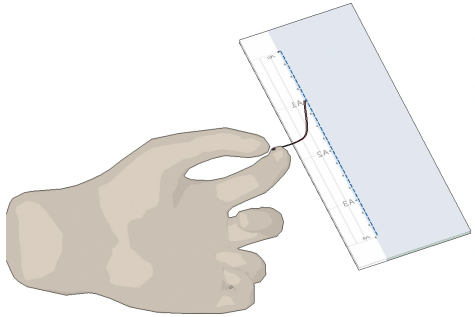

1 Slip under and cut

Step help

Slide the long prong under both red strands, guide them into the notch, and cut. Keep clear of the fabric and leave the machine stitches intact.

2 Pull out the basting

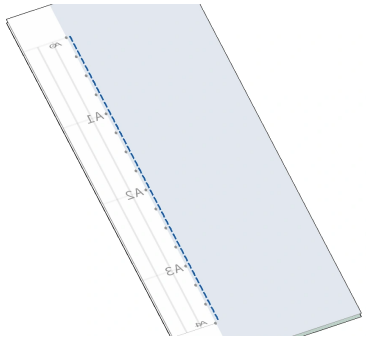

Step help

Pull as many stitches after your initial cut as you can. If the basting thread gets stuck, make another cut near the jam.

Remove basting

3 Remove remaining threads

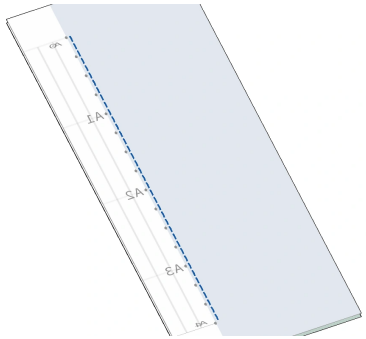

Step help

Repeat cutting and pulling until no more basting thread remains.

Remove basting · Tips

1 Tips 1

Step help

If some sections of the thread feel hard to remove, it is okay to leave some here and there. Make sure the thread is not visible on the right side of the fabric, and trim any remaining thread segments short and clean.
