Thread a needle

Full guide

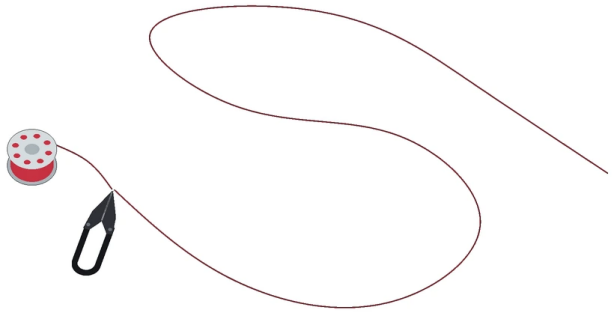

1 Measure an arm-length

Step help

Unwind a comfortable arm-length of red basting thread from the metal bobbin.

2 Cut the thread

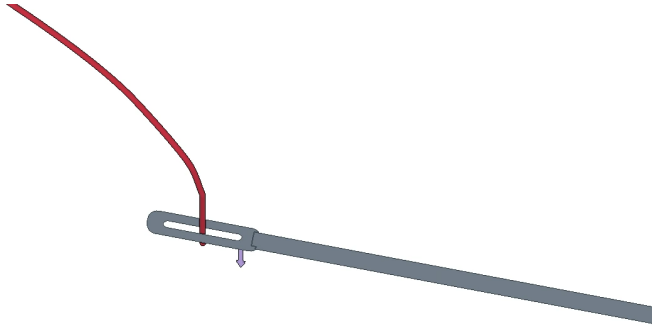

Step help

Snip the thread with the kit clippers.

Thread a needle

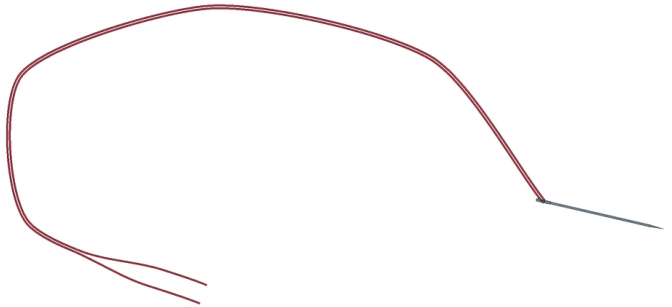

3 Pass through the eye

Step help

Pass one end through the needle eye. A needle threader can help.

4 Even up the tails

Step help

Pull through until the two free ends meet. The needle sits at the fold of the doubled thread.
